Located in New York’s Hudson River Valley, Helen Hayes Hospital primarily serves patients from throughout the New York Metropolitan region and also attracts patients from across the country.

In 2016, the hospital treated 1552 inpatients, who ranged in age from 14 - 98, with 847 male and 705 female.

The referring physician’s protocols concerning weight bearing, medication and therapies are precisely followed and form the basis of the treatment plan at HHH, which may include:

- Physical & Occupational Therapy
- Individual & group therapy utilizing NuStep®, CPM & other equipment
- Pain management
- Patient education including falls prevention
- Customized home exercise program

Both acute and sub-acute rehab options are available for orthopedic/joint replacement patients.

¹ Our Joint Replacement patients consistently have a shorter length of stay than the nation and the region.
² While patients with other Orthopedic conditions may stay a day longer than the national average, both groups of patients make greater functional gains as compared to the region and the nation.
³ Almost all HHH patients continue to be living at home 3 months post discharge, a testament to the care received at HHH.

Measuring Up: Helen Hayes Hospital participates in the following nationally recognized databases that allow us to compare our patient outcomes against other facilities, both regionally and nationally:

- eRehabData – measures the patient’s functional gains during their acute rehabilitation hospitalization
- IT HealthTrack – assesses the patient’s status three months after discharge
- Press Ganey – measures and tracks patient satisfaction with hospital facilities, programs, services and staff
Helen Hayes Hospital has a well-earned reputation of excellence in rehabilitation medicine. For over 110 years, we have excelled in providing the medical, nursing and therapeutic care patients need to rebuild their lives following catastrophic injuries, debilitating surgeries and chronic disabling illnesses. Paired with state-of-the-art equipment and technology, this expertise enables our patients to move on to active and productive lives and return to work, school and home.

Our interdisciplinary team approach to rehabilitation
and depth of medical, nursing and therapeutic care, paired with the most cutting-edge rehab technology, means we can admit patients sooner in their recovery. All patients receive a minimum of three hours of therapy daily, allowing them to make functional gains at an accelerated rate.

One of the country’s very first specialty physical rehabilitation facilities.

Best nurses, aids, physical therapists, and occupational therapists. I went from not walking to walking, climbing steps, and gaining my independence. HHH is a five-star facility. What the therapy staff did for me in nine days, three hours a day, was incredible.
