

Inpatient Rehabilitation Amputee Patient Outcomes 2023

Located in New York's Hudson River Valley, Helen Hayes Hospital primarily serves patients from throughout the New York Metropolitan region and also attracts patients from across the country.

In 2023, the hospital treated 676 inpatients, who ranged in age from 14 - 96.

This service is well equipped to help patients with amputation due to trauma, diabetes, or other medical conditions. Limb loss may include above knee amputations, below knee amputations, upper extremity amputations, and double amputations.

The strength of our program is two fold: being able to manage medically fragile patients, particularly those with complex needs, and providing their medical and rehabilitation care simultaneously in order to maximize recovery. Specific goals are tailored to each patient's individual needs: to build endurance, stamina, and strength; to encourage independence at home; to increase mobility.

Patients have access to an on-site comprehensive Prosthetic Orthotic Center, which fabricates artificial limbs and other orthotic devices, as well as an Amputee Support Group.

INPATIENT AMPUTEE OUTCOMES AT HELEN HAYES HOSPITAL 2022

Average Length of Stay (Days)	13.53
Discharge to Community (%)	46.67
Case Mix Index ¹	1.40

¹The higher the value, the more severe the case.

Measuring up: Helen Hayes Hospital participates in the following nationally recognized databases that allow us to compare our patient outcomes against other facilities, both regionally and nationally:

eRehabData – measures the patient's functional gains during their acute rehabilitation hospitalization

Press Ganey – measures and tracks patient satisfaction with hospital facilities, programs, services, and staff

Patient Satisfaction Score

845-786-4194

Our interdisciplinary team approach to rehabilitation

and depth of medical, nursing, and therapeutic care, paired with the most cutting-edge rehab technology, allows us to admit patients sooner in their recovery. All patients receive a minimum of three hours of therapy daily, allowing them to make functional gains at an accelerated rate.

“ The care I received was outstanding, the encouragement I was given daily was above and beyond anything that I expected. I owe a large amount of my speedy recovery to the support and care I got from your organization.”

One of the country's very first specialty physical rehabilitation facilities.

Helen Hayes Hospital has a well-earned reputation of excellence in rehabilitation medicine. For over 123 years, we have excelled in providing the medical, nursing, and therapeutic care patients need to rebuild their lives following catastrophic injuries, debilitating surgeries, and chronic disabling illnesses. Paired with state-of-the-art equipment and technology, this expertise enables our patients to move on to active and productive lives and return to work, school, and home.
